

FERNANDO DORANTES MONSIVÁIS

FULL STACK DEVELOPER

I am passionate about building products, microservices and ecosystems that impacts society letting people gain money and improve their quality of life.

PROFESSIONAL EXPERIENCE

2022

Rabbit / *Grocery delivery*

As Backend Engineer I participated creating new features and improvements in the logistic and back office teams making dynamics and cached reports services, internal and external systems synchronizations using AWS lambdas, MongoDB, NestJS and Jest.

As Staff Software Engineer I developed microservices to centralize all incoming webhooks and synchronize billing events from SAT Inbox and then emit each one in Kafka.

As technical leader and backend engineer I participated in Vendorplace, Checkout, Engage and Connect using Angular, Electron, NestJS, Kafka, MongoDB and Postgres. Also I made technical interviews with hiring candidates.

2020 / 2022

Yaydoo / *Buying, Selling and Payments Platform*

I participated as backend developer for Gulf App and Movistar Uruguay teams using Express, Loopback, MongoDB, S3 and Lambdas creating new features for their customers about billing and loyalty programs.

2019 / 2020

Econocom Gigigo / *International Agency*

I participated as full stack developer of a geolocated desserts delivery webapp using Laravel, React, Express, MySQL, Postgres and APIs like Mixpanel, Sentry, Conekta, Cloudinary, Google maps, and Cabify.

2018 / 2019

Merengue Merengue / *Desserts delivery*

As backend developer I participated adding support for multiple cities creating geofences, a migration from Laravel to ExpressJS and performance improvements in their microservices letting company sell concessions and run in other cities in Mexico.

2017

Yapp / *Transporting and food delivery*
